OUR STORY

Why We Started Tayyari Simplified

Every serious UPSC aspirant dreams of serving the nation through the Civil Services. Having experienced the UPSC journey ourselves, we realised that success is not just about working harder—it is about following the right strategy, receiving proper guidance, and staying consistent.

As we remained closely connected with the UPSC ecosystem, we saw that while the examination had evolved, the preparation methods had not. Students were overwhelmed with information but often lacked clarity, direction, and accountability.

They needed mentorship—not just more content. We began by mentoring aspirants offline, helping them identify their strengths, overcome challenges, and prepare with a structured approach. The results reinforced our belief that personalised guidance can truly transform preparation.

That belief led to the creation of Tayyari Simplified—a platform dedicated to making structured mentorship, strategic guidance, and continuous accountability accessible to every serious UPSC aspirant.
